Patent Assignment

This assignment made on this 25th day of July, 2023, by Matthew Higgins (the "Assignor"), to Hawk Spider Energy Corp., a New Mexico corporation ("Assignee").

WHEREAS Assignor is the inventor of the invention (the "Invention") that is the subject of U.S. Patent Application No. 17706344, titled, "DYNAMIC MASS TORQUE GENERATOR," filed March 28, 2022 (the "Patent Application").

WHEREAS Assignor desires to assign Assignor's entire right, title, and interest in and to said Invention, Patent Application, and any resulting utility patent applications and patents (and any reissues or extensions) that may be granted to Assignee.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor assigns to Assignee the entirety of his right, title, and interest in the Invention and Patent Application (as well as such rights in any utilities, divisions, continuations in whole or part, or substitute applications) to Assignee for the entire term of the Patent Application and the patent (and any utilities, reissues, or extensions) that may be filed and granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisionals, continuations in whole or part, or substitute applications) filed claiming the benefit of the Patent Application.

Assignor represents and warrants that he has not granted and will not grant to others any rights inconsistent with the rights granted herein. Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States and of all foreign countries to issue any patents resulting from the Patent Application to Assignee according to this Agreement. The right, title, and interest are to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of any patent applications resulting from the Patent Application and foreign counterparts; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent Application and any resulting utility applications for the invention in any and all countries.

IN WITNESS WHEREOF, Assignor has executed this Assignment on the date first above written.
