PATENT ASSIGNMENT AGREEMENT

THIS PATENT ASSIGNMENT AGREEMENT (“**Patent Assignment**”), dated as of March 21, 2023, is made by and between Aman Trehan, residing at Hillsborough, New Jersey, (“**Assignor**”), and Somerset Therapeutics, LLC, a corporation with offices located at 6100 Hollywood Boulevard, Suite 207, Hollywood, Florida 33024 (“**Assignee**”);

WHEREAS, Assignor is the inventor of the invention(s) described in the patent application entitled OPTHALMIC GEL COMPOSITIONS OF BIMATOPROST AND TIMOLOL AND ASSOCIATED METHODS, filed with the United States Patent and Trademark Office (“**USPTO**”) on March 21, 2023 and assigned US Application No. 18/187,507 (the “**Application**”);

WHEREAS, Assignee is desirous of acquiring, from Assignor, without limitation, the entire and exclusive right, title, and interest in and to (a) the Application and (b) any and all continuations, continuations-in-part, divisionals, substitutions, and renewals of the Application; any and all patents that issue from any of the foregoing; any extensions, reissues, reexaminations or similar rights arising from or related to such issued patents; and any other related patents, patent applications, or similar rights arising in the United States and in any other country(ies) throughout the world which benefit from a claim of priority to the Application or a sequence of priority claims traceable back to the Application, and all invention(s) disclosed or both disclosed and claimed in any of the foregoing (collectively the “**Related Applications and Patents**”).

NOW, THEREFORE, for good and sufficient consideration, the receipt and sufficiency whereof are hereby acknowledged, Assignor hereby sells, assigns, and transfers unto said Assignee, the entire and exclusive right, title, and interest in the Application and Related Applications and Patents that may be granted therefor in the United States and in all foreign countries, territories, and jurisdictions in the world. The worldwide rights assigned to Assignee hereunder apply for the full terms of the Application and the Related Applications and Patents and for all rights therein and associated therewith, including, but not limited to, any and all past, present, or future royalties, profits, damages, fees, income, payments, and other

proceeds now or hereafter due or payable based on infringement of any thereof, and the right to claim priority under the terms of any applicable law to the Application and the Related Applications and Patents.

Assignor represents and warrants that he is fully able to convey all rights and interests herein assigned and that he will not execute any instrument or grant or transfer any rights or interests inconsistent with the rights and interests granted herein. Assignor grants Assignee the right to communicate Assignor's name and mailing address to patent authorities and patent counsel and Assignor agrees to take such steps and actions, and to provide such cooperation and assistance to Assignee and its successors, assigns, and legal representatives, in connection with the Applications and the Related Applications and Patents, as may be necessary to effect, evidence, or perfect the assignment to Assignee, including, but not limited to executing and delivering any affidavits, declarations, oaths, and confirmatory assignments. Assignor acknowledges that Assignee may freely disclose this Patent Assignment to other persons and record it with governmental authorities, including patent offices and examining authorities throughout the world, and that Assignee may prepare, execute, submit, and record additional documents evidencing Assignor's assignment of the Application and Related Applications and Patents. Assignor acknowledges that any such documents, including any document styled as an assignment, will not constitute a limitation or modification of this Patent Assignment and in the event of any conflict between such documents and this Patent Assignment, the terms of this Patent Assignment will control.

Assignor further covenants that whenever Assignor is reasonably called upon by Assignee to communicate any facts known to Assignor relating to the invention(s), the Application, and/or the Related Applications and Patents; to execute and deliver any and all lawful papers; to make all rightful oaths, affidavits, or declarations; and to perform any other lawful acts that may be deemed by Assignee reasonably necessary or desirable to allow Assignee to obtain, secure, vest, or benefit from any and all rights herein confirmed or assigned, or to perfect the title to such invention(s), the Application, and any Related Applications and Patents, in the name of and for the benefit for Assignee, Assignor will promptly provide such assistance in good faith and at no further cost to Assignee, provided that such actions do not result in any clearly demonstrable, and substantial out-of-pocket costs to

Assignor. Assignor acknowledges and agrees the rights granted to Assignee under this Patent Assignment are of a special and extraordinary character that gives them special and/or immeasurable value, the loss of which cannot reasonably or adequately be compensated for in damages in an action at law, and the breach by Assignor of the provisions herein shall cause Assignee irreparable injury and damage and that, accordingly, Assignee will be entitled as a matter of right to injunctive and other equitable relief to prevent the violation of this Patent Assignment, in addition to any other rights or remedies that Assignee may have to damages or otherwise pursuant to this Patent Assignment or Applicable Law.

This Patent Assignment will be construed under the laws of the United States and the State of Florida, without regard to conflicts of law principles. If any part or parts of this Patent Assignment shall be held unenforceable for any reason, the remainder of this Patent Assignment shall continue in full force and effect. If any provision of this Patent Assignment is deemed invalid or unenforceable by any court of competent jurisdiction, and if limiting such provision would make the provision valid, then such provision shall be deemed to be construed as so limited. This Patent Assignment inures to the benefit of the Assignee and its successors, assigns, and other legal representatives, and is binding on the Assignor and his respective heirs, legal representatives, and assigns. This Patent Assignment constitutes the entire agreement between Assignor and Assignee concerning ownership of the Application and Related Applications and Patents and supersedes any prior understanding or representation of any kind preceding the date of this Patent Assignment. There are no other promises, conditions, understandings or other agreements, whether oral or written, relating to the subject matter of this Patent Assignment.
