## PATENT ASSIGNMENT

This ASSIGNMENT, effective as of December 21, 2022, between Justin Clausse (“Assignor”), Individually, and Sirius Sleep Systems, Inc (“Assignee”), a Florida Corporation.

WHEREAS the Assignee is wholly-owned by Justin Clausse;

WHEREAS Assignee was formed on December 20, 2022 to carry on the business of Sirius Sleeper, LLC and Justin Clausse;

WHEREAS Assignor is the exclusive owner of the entire right, title and interest in, to and under the patents (whether expired, abandoned, or in force) and related patent applications (whether expired, abandoned, issued as patents, or not) as set forth on Schedule 1 (hereafter referred to as “Patents”);

WHEREAS Assignor desires to assign all of its right, title and interest in and to all of the Patents to Assignee;

NOW, THEREFORE, for \$1.00 and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound,

Assignor hereby sells, assigns, transfers, and conveys to Assignee, effective immediately upon Assignor’s signature hereon, and Assignee hereby accepts from Assignor, all of Assignor’s right, title and interest throughout the world in and to the Patents, including all related inventions, registrations, applications, renewals, extensions, provisionals, substitutions, certificates of invention, divisionals, continuations, continuations-in-part, re-issues, and reexaminations thereof, claims to priority, including any other counterparts or equivalents thereto worldwide, as fully and entirely as the same would have been held by Assignor had this assignment not been made, and covenants that Assignor has full right so to do, together with all (a) income, royalties, damages, and payments due or payable as of the Effective Date or thereafter (including damages and payments for past, present or future infringements); and (b) corresponding rights that, nor or hereafter, may be secured throughout the world with respect to any such Patents. Assignor hereby waives any moral rights, including, but not limited to, rights of attribution, integrity, and disclosure arising from all of the Patents, together with all claims for damages and other remedies asserted on the basis of moral rights, and hereby sells, assigns, transfers, conveys, and delivers to Assignee any waivers granted to Assignor of any such moral rights.

Assignor hereby covenants, agrees and undertakes to execute and deliver to Assignee, whenever requested by Assignee and without further compensation to Assignor, all applications, assignments, lawful oaths and any other papers which Assignee may deem necessary and/or desirable in connection with the perfection in Assignee of the rights assigned pursuant to this Assignment, recording such assignment and for securing to Assignee or for maintaining for Assignee such rights, including, without limitation, the execution of separate assignments to accomplish or record such sale, assignment, transfer, conveyance, or delivery to Assignee of such rights in any other country or jurisdiction, and to cooperate and assist reasonably Assignee to do all other affirmative acts in connection therewith. Assignor hereby irrevocably appoints Assignee as its attorney-in-fact (which appointment shall be deemed coupled with an interest) with respect to the assigned Patents to act in Assignor’s name, place and stead to execute, deliver and record any document or instrument of

assignment required in any country in which such documents may be required to sell, assign, transfer, convey, deliver, or confirm the rights sold, transferred, conveyed, delivered and confirmed herein.

Assignee shall have the right to file or record this Assignment and any additional assignment documents described herein with the United States Patent and Trademark Office and any other equivalent authority, entity, or agency anywhere else in the world, and Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks and any such equivalent authorities, entities or agencies to record Assignee as the assignee and owner of the assigned Patents.

This Assignment shall be governed by and construed in accordance with the laws of the State of Florida without regard to the conflicts of laws provisions thereof.
