## **ASSIGNMENT OF INTELLECTUAL PROPERTY RIGHTS**

This agreement is between Sourcing Network International, LLC, a Delaware limited liability company, 2<sup>nd</sup> Floor, 85 Rio Grande Drive, Castle Rock, CO 80104 ("Assignor") and Solaray, LLC, a Delaware limited liability company, 2<sup>nd</sup> Floor, 85 Rio Grande Drive, Castle Rock, CO 80104.

WHEREAS, Assignor has invented, developed and owned valuable properties in the field of consumer goods (the "Inventions");

WHEREAS, Assignor has filed for patent protection covering the Inventions, to wit, the patents and patent applications listed on Schedule A of this agreement (the "Patent Properties");

WHEREAS, Assignor transferred its interest in the Inventions and Patent Properties to Assignee pursuant to the Asset Purchase Agreement dated August 28, 2017;

WHEREAS, Assignor and Assignee expect Assignee to acquire the entire right, title and interest to the Inventions, the Patent Properties, and all current and future embodiments and continuations of same, both in the United States and overseas;

NOW, THEREFORE, for good and valuable consideration, Assignor, by these presents, does sell, assign and transfer unto Assignee, *nunc pro tunc*, the full and exclusive right to the Inventions and Patent Properties in the United States, and the entire rights, title and interest in and to any and all patents which may be

granted therefor in the United States, including pursuant to the Patent Properties, which are expressly assigned by Assignor to Assignee hereunder. Assignor hereby authorizes and requests the Director of the U.S. Patent & Trademark Office to issue any patent pursuant to the Inventions, and to transfer any provisional or non-provisional patent applications for same, including the Patent Properties, to Assignee, including the entire right, title and interest in and to the same, for their sole use and behoof, and for the use and behoof of their successors and assigns, to the full end of the term for which any such patent may be granted, as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made. This assignment expressly covers all continuation applications filed by Assignor in connection with the Inventions and Patent Properties, at any time in the future. A copy of this assignment agreement shall suffice to support the assignment to Assignee of any such continuation applications at the time they are filed with the United States Patent & Trademark Office. Notwithstanding, Assignor hereby agrees to execute such documents as shall be reasonably necessary to support the efforts of Assignee to file patent applications based on the Patent Properties or on the Inventions generally with the U.S. Patent & Trademark Office, and all continuation patent applications connected with same.

Assignor does further sell, assign and transfer unto Assignee the full and exclusive right to the Inventions and Patent Properties throughout the world, including pursuant to the Patent Properties, and the entire rights, title and interest in and to any and all patents which may be granted therefor anywhere in the world, as based on the PCT system or any other treaty rights flowing from the Patent

Properties or otherwise. Assignor hereby agrees to execute such documents as shall be reasonably necessary to support the efforts of Assignee to file foreign country patent applications based on the Patent Properties or on the Inventions generally, and all continuation patent applications connected with same. Assignor further agrees that the entire right, title and interest in and to such foreign country patents that issue from such foreign country patent applications shall be in the name of Assignee, and for their sole use and behoof, and for the use and behoof of their successors and assigns, to the full end of the term for which such patents may be granted, as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made.

Assignee hereby acknowledges receipt of the entire right, title and interest in and to the Patent Properties and the Inventions generally.
