WHEREAS, CalPro Holdings, LLC, a Delaware limited liability company having an office and place of business at 2905 Casco Point Road, Wayzata, MN 55391, (hereinafter "Assignor") was the owner of assets identified in Appendix A (hereinafter collectively the "Patent Properties"), including all inventions and other subject matter described therein (hereinafter collectively the "Inventions");

AND WHEREAS, CalPro ADAS Solutions, LLC, a Minnesota limited liability company having an office and place of business at 2905 Casco Point Road, Wayzata, MN 55391, (hereinafter "Assignee") is desirous of confirming the assignment of the entire right, title, and interest in and to the Patent Properties and the Inventions, and any patent to be obtained in relation therefor, for which an original assignment was executed on November 12, 2021 ("Nov. 12, 2021 Assignment");

NOW, THEREFORE, to all whom it may concern, be it known that for good and valuable consideration, the receipt and sufficiency whereof is hereby acknowledged, the Assignor hereby acknowledges and confirms all conveyances recited in the Nov. 12, 2021 Assignment, and to the extent not previously explicitly assigned or to the extent that any prior conveyance, grant, or assignment is deemed inoperative or ineffective, herein:

ASSIGNS, CONVEYS, AND TRANSFERS to the Assignee the Assignor's entire right, title, and interest for the United States and all foreign countries and jurisdictions in and to:

said Inventions throughout the world;

said Patent Properties, including all original and reissued patents which have been or shall be issued in the United States and all foreign countries and jurisdictions based in whole or in part on any of said Patent Properties;

all divisional, continuing (including continuation-in-part), substitute, renewal, reissue, and all other applications for a patent or patents which have been or shall be filed in the United States (including all provisional and non-provisional applications), and in all foreign countries and jurisdictions, based in whole or in part on any of said Patent Properties or Inventions (including any application for a utility model or an innovation patent application);

the right to claim priority to said Patent Properties in relation to subject matter based in whole or in part on said Patent Properties, said Inventions, or any of the foregoing, including the right to file foreign applications under the provisions of any convention or treaty;

and the right to all causes of action, remedies, and other enforcement rights related to said Patent Properties and Inventions, including without limitation the right to sue for past, present, or future infringement, misappropriation, or violation of any and all rights related to said Patent Properties, said Inventions, and any of the foregoing, including the right to obtain and collect damages and/or royalties due for past, present, or future infringement;
