PATENT ASSIGNMENT AGREEMENT

This PATENT ASSIGNMENT AGREEMENT ("Patent Assignment"), dated as of 5 Nov, 2023, is made by Robert J. Medoff, Lars G. Teitman, and David Medoff ("Inventors"), the co-inventors of the Assigned Patents (defined below), in favor of TriMed Inc. ("Assignee"), a California corporation.

WHEREAS, Inventors wish to convey, transfer, and assign certain intellectual property to Assignee, and to execute and deliver this Patent Assignment for recording with the United States Patent and Trademark Office and, at Assignee's option, corresponding entities or agencies in other jurisdictions;

NOW THEREFORE, Inventors agree as follows:

1. Assignment. For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Inventors hereby irrevocably and unconditionally convey, transfer, and assign to Assignee all of Inventors' right, title and interest in, to and under the following (the "Assigned Patents"):

(a) the patents and patent applications set forth in Schedule I hereto, all related patents and patent applications in any jurisdiction, and all issuances, divisions, continuations, continuations-in-part, issuances, reissues, extensions, reexaminations, renewals and international equivalents thereof and the inventions claimed therein;

(b) any other patent or patent application claiming priority, or entitled to claim priority, directly or indirectly, to (i) the foregoing or (ii) any patent or patent application from which any of the foregoing claims, or is entitled to claim, direct or indirect priority;

(c) all rights of any kind whatsoever accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions, and otherwise throughout the world;

(d) any and all royalties, fees, income, payments, and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and

(e) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on, or after the date hereof, including all rights to and claims for damages, restitution, and injunctive and other legal and equitable relief for past, present and future infringement, misappropriation, violation, misuse, breach, or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Recording and Further Actions. Inventors hereby authorize the Commissioner for Patents in the United States Patent and Trademark Office, and the officials of corresponding entities or agencies in any other jurisdictions, to record and register this Patent Assignment upon request by Assignee (and its successors and assigns). Following the date hereof, upon request of Assignee (and its successors and assigns), Inventors shall take such steps and actions, and provide such cooperation and assistance to Assignee (and its successors and assigns), including the

execution and delivery of any affidavits, declarations, oaths, exhibits, assignments, powers of attorney, or other documents, as may be necessary or desirable to effect, evidence, confirm, record or perfect the assignment of the Assigned Patents to Assignee (and its successors and assigns).

3. Counterparts. This Patent Assignment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall be deemed one and the same agreement. A signed copy of this Patent Assignment delivered by facsimile, e-mail, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original signed copy of this Patent Assignment.
