ASSIGNMENT

I have, solely or jointly, invented the new and useful invention(s) and improvement(s) (hereinafter, "Invention(s)") described in the patent application entitled **DENTAL 3D SCANNER WITH ANGULAR-BASED SHADE MATCHING** filed on **18 May 2018** as Application Number: **62/673,390** in the **United States Patent and Trademark Office** which names the inventor(s) (collectively, hereinafter "Assignor(s)") thereof as follows: **Victor C. Wong; James R. Milch; Yannick Glinec** (hereinafter, "Patent Application").

I hereby confirm and memorialize my sale, transfer, and assignment, whether by contract, operation of law, or otherwise, exclusively to **CARESTREAM DENTAL TECHNOLOGY TOPCO LIMITED** having a place of business at Wiltron House, Rutherford Close, Meadway Tech Park, Stevenage, Hertfordshire SG1 2EF United Kingdom (hereinafter "Assignee") and to its successors and assigns, of my entire right, title and interest, including, without limitation, any and all rights to claim priority in and to said Patent Application under the terms of any applicable conventions, treaties, statutes or regulations, in and to any and all Invention(s) described in said Patent Application, and in and to said Patent Application itself. In the event said sale, transfer, and assignment of said rights to claim priority, Invention(s) and Patent Application is, for any reason, void, invalid, of no cause or effect, or was never previously made, I hereby sell, transfer, and assign exclusively to Assignee and its successors and assigns for consideration in the sum of One Dollar (\$1.00) or for other good and valuable consideration (including my salary, compensation, payment(s) for the making of inventions, and/or employee benefits) the receipt and sufficiency of which is hereby acknowledged, my entire right, title and interest in and to any and all rights to claim priority in or to said Patent Application under the terms of any applicable conventions, treaties, statutes or regulations, in and to any and all Invention(s) described in said Patent Application, and in and to said Patent Application itself. I also hereby acknowledge and confirm that I was subject to an obligation of assignment to Assignee with respect to my entire right, title and interest in and to said Invention(s) at the time it was/they were made.

Additionally, without further consideration and together with said rights to claim priority, Invention(s), and Patent Application, I hereby confirm my sale, transfer, and assignment exclusively to Assignee of or do hereby sell, transfer, and assign exclusively to Assignee, as the case may be, my entire right, title and interest in and to any corresponding or counterpart patent applications of, any patent applications based on, or any patent applications claiming priority, directly or indirectly, to said Patent Application, including without limitation, any and all (i) United States provisional or non-provisional patent applications and any divisional, continuation, continuation-in-part, substitute, reissue, reexamination patent applications thereof, (ii) non-United States patent applications, and continuation or divisional patent applications thereof, (iii) regional patent applications, and (iv) international patent applications and national stage patent applications thereof. I also do hereby confirm my sale, transfer, and assignment exclusively to Assignee of or do hereby sell, transfer, and assign exclusively to Assignee, as the case may be and without further consideration, my entire right, title and interest in and to all Letters Patent(s) and similar protective rights granted on said Patent Application or on any of the above-described patent applications. I hereby confirm or agree that any of the above-described patent applications, at Assignee's sole discretion, may be filed and issued in the name of Assignee, its designee, or its successors or assigns.

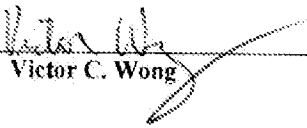

Further, I agree to execute documents which in the judgment of Assignee may be necessary to file or prosecute any of the above-described patent applications, to obtain any of the above-described patents or similar protective rights, or to vest or maintain title thereto in Assignee, its designee, or its successors or assigns. I also agree that, upon request, but without out-of-pocket expense to myself, I shall furnish to Assignee, its designee, or its successors or assigns any data, information, exhibits, memoranda, or other evidence in my possession relating to any of said Invention(s) or to any of the above-described patent applications, and shall testify and assist in any ex parte, inter partes, reexamination, opposition, lawsuit, or other legal or administrative proceedings relating thereto. Additionally, I hereby confirm my sale, transfer, and assignment of or do hereby sell, transfer, and assign, exclusively to Assignee, as the case may be and without further consideration, my entire right, title and interest in and to the right to sue and collect damages for all past, present, or future infringement of any patents granted or issued on the above-described patent applications; the same for Assignee's successors, assigns, nominees and legal representatives, as fully and entirely as the same would have been held by me had the sale, transfer, and assignment of my right to sue and collect damages not been made. In addition, I hereby authorize and consent to the country, region, and/or type, application number, and filing date of said Patent Application being inserted into this Assignment once known and into other assignment documents for counterpart or related patents and/or patent applications in the same family of patents and patent applications.

This Assignment shall be governed, construed and interpreted in all respects in accordance with the laws of the State of Georgia, United States of America and is expressly made NUNC PRO TUNC to have the same legal force and effect as if executed on **18 May 2018** (the "Effective Date" of this Assignment). If, for any reason, this Assignment is not deemed to have the same legal force and effect as if executed on the Effective Date, then this Assignment shall be effective as of the date one day prior to the filing date of the Patent Application.
