PATENT ASSIGNMENT

Medic, Inc. ("**Assignor**") possesses the entire right, title, and interest in and to the US and foreign patents, and patent applications, listed in the attached Schedules A1, A2 and A3 (the "**Assigned Patents**").

Guardian Health, Inc. ("**Assignee**") desires to acquire all of Assignor's rights in and to the Assigned Patents and all patent applications, patents, and other rights deriving or resulting therefrom.

Therefore, for valuable consideration, the receipt of which is hereby acknowledged, Assignor assigns and transfers to Assignee all of Assignor's right, title, and interest in (a) the Assigned Patents; (b) with respect to all inventions included in the Assigned Patents, all improvements and modifications thereof, (c) with respect to all patent applications that are included in the Assigned Patents, all patents that may issue therefrom; (d) with respect to all patents and patent applications that are included in the Assigned Patents or that may issue therefrom, all divisions, continuations, reissues, and extensions thereof.

Assignor agrees to: (a) cooperate with Assignee, its representatives, successors, and assigns in perfecting and securing the transfer of the Assigned Patents to Assignee, including but not limited to execution, verification, acknowledgment, and delivery of such further papers, deeds, bills of sale, assignments, and other instruments of transfer as may be necessary or appropriate to consummate and give full effect to the assignments and transfers referenced herein; (b) cooperate with Assignee, its representatives, successors, and assigns in the prosecution of any patents and patent applications that are included in the Assigned Patents or that may issue therefrom, including any foreign counterparts; and (c) perform such other acts, at Assignee's expense, as Assignee lawfully may request to obtain and carry out the purposes of this Patent Assignment.

In witness whereof, Assignor hereby executes this Patents Assignment on this 16th day of January, 2024.
