ASSIGNMENT AGREEMENT

This IP Assignment Agreement ("**Assignment**") is made by and between Magna-Lastic Devices, Inc., a Delaware corporation having its principal office at 8750 W Bryn Mawr Ave, Suite 1000, Chicago IL 60631 ("**Assignor**"), and Methode Electronics, Inc., a Delaware corporation having its principal office at 8750 W Bryn Mawr Ave, Suite 1000, Chicago IL 60631 ("**Assignee**"), as of the date executed by the parties below.

WHEREAS, the term "**Assigned IP**" means

- (a) all patents and patent applications of Assignor and all issuances, divisions, continuations, continuations-in-part, reissues, extensions, reexaminations, and renewals thereof (the "Patents") including those listed on Exhibit A hereto;
- (b) all trademark registrations and applications of Assignor and all issuances, extensions, and renewals thereof (the "Trademarks"), together with the goodwill of the business connected with the use of, and symbolized by, the Trademarks; provided that, with respect to the United States intent-to-use trademark applications, the transfer of such applications accompanies, pursuant to the Asset Purchase Agreement, the transfer of Seller's business, or that portion of the business to which the trademark pertains, and that business is ongoing and existing;
- (c) all copyright registrations and applications for registration of Assignor and all issuances, extensions, and renewals thereof (the "Copyrights");
- (d) all rights of any kind whatsoever of Seller accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions, and otherwise throughout the world;
- (e) any and all royalties, fees, income, payments, and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and
- (f) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on, or after the date hereof, including all rights to and claims for damages, restitution, and injunctive and other legal and equitable relief for past, present, and future infringement, dilution, misappropriation, violation, misuse, breach, or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

WHEREAS, Assignee is desirous of acquiring all of Assignor's right, title and interest in and to the Assigned IP;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby unconditionally and irrevocably sell, assign, transfer, convey and deliver to Assignee, and its successors, assigns, nominees, or other legal representatives, free and clear of all liens, encumbrances, rights and claims of any third party, Assignor's entire right, title and interest in and to all of the following, throughout the world, whether existing now or in the future:

- (a) the Assigned IP;
- (b) all inventions described in any of the Assigned IP that (i) are included in any claim in the Assigned IP, and/or (ii) are subject matter capable of being reduced to a patent claim in a reissue or reexamination proceeding brought on any of the Assigned IP, and/or (iii) are disclosed in an enabling manner in any of the Patents;

(c) all rights to apply for, file prosecute, register, maintain, extend and renew, in any and all countries of the world (i) Patents and other governmental grants or issuances of any type that claim any of the inventions described in (b), (ii) Trademarks, and (iii) any other Assigned IP;

(d) to the extent they exist, any and all remedies, claims, causes of action and other enforcement rights of any kind (whether known or unknown or whether currently pending, filed, or otherwise, and whether accrued or accruing in the past, present or future) under, pursuant to, or on account of, any of the Assigned IP and/or the rights described in (b) and/or (c), including all causes of action and other enforcement rights for (i) all past, current, and future damages, (ii) injunctive relief, and (iii) any other remedies of any kind for past, current, and future infringement; and

(e) any and all other rights associated with the Assigned IP not expressly set forth herein

Assignor also hereby authorizes the respective patent office or governmental agency in each jurisdiction to issue any and all patents or certificates of invention which may be granted upon any of the Assigned IP in the name of Assignee, as the assignee of the entire interest therein.

EXHIBIT A
ASSIGNED PATENTS

Publication. Patent No.	Title
US 2010/0301846	Magnetic Speed Sensor and Method of Making the Same
US 5,887,335	Method of producing a circularly magnetized non-contact torque sensor
US 6,047,605	Collarless circularly magnetized torque transducer having two phase shaft and method for measuring torque using same
US 6,145,387	Collarless circularly magnetized torque transducer and method for measuring torque using same
US 6,220,105	Magnetoelastic disc-shaped load cell having spiral spokes
US 6,513,395	Circularly magnetized disk-shaped torque transducer and method for measuring torque using same
US 6,553,847	Collarless circularly magnetized torque transducer and method for measuring torque using the same
US 6,655,471	Impact tool control method and apparatus and impact tool using the same
US 6,761,229	Impact tool control apparatus and impact tool using the same
US 6,765,357	Impact tool control method and apparatus and impact tool using the same
US 8,087,304	Magnetoelastic Torque Sensor with Ambient Field Rejection
