## ASSIGNMENT

**Johnson Controls Technology Company** of 5757 N. Green Bay Avenue, Milwaukee, Wisconsin 53209, a Michigan corporation, ("Assignor") is owner of 100% interest in and to the invention "ELECTRICAL POWER STORAGE DEVICES", as described in U.S. Patent Application Serial No. 15/352,186, filed November 15, 2016, which is a divisional application of United States Patent Application No. 13/129,323 filed July 25, 2011, entitled "Electrical Power Storage Devices," now US Patent No. 9,525,177, which is a National Stage Entry of International Patent Application No. PCT/US09/064992 filed November 18, 2009, which claims priority to U.S. Provisional Application No. 61/115,815 filed November 18, 2008, and U.S. Provisional Application No. 61/150,987 filed February 9, 2009 (collectively, the "Patent Applications"). **Johnson Controls Autobatterie GmbH & Co. KGaA** of Am Leineufer 51, 30419 Hannover, Germany, ("Assignee") desires to acquire rights in and to the Patent Applications and the Patent and any reissues or extensions that may be granted.

Therefore, for valuable consideration, the receipt of which is acknowledged, **Johnson Controls Technology Company** ("Assignor") assigns to **Johnson Controls Autobatterie GmbH & Co. KGaA** ("Assignee") an undivided one-half interest of Assignor's rights, titles and interests in and to the invention(s) and Patent Application(s) (as well as such rights in any divisions, continuations in whole or part or substitute applications) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part or substitute applications) filed claiming the benefit of the Patent Applications.

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Application jointly to Assignor and Assignee according to the undivided interest indicated in this Assignment. The right, title and interest is to be held and enjoyed by Assignor and Assignee and their successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this Assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.

IN WITNESS WHEREOF the parties hereto have caused this Assignment to be duly executed. Each party warrants and represents that its respective signatories whose signatures appear below have been and are, on the date of signature, duly authorized to execute this Assignment.

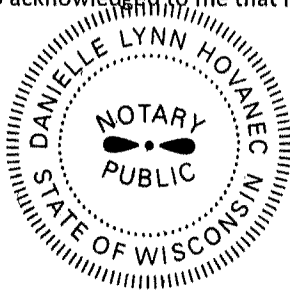

JOHNSON CONTROLS TECHNOLOGY COMPANY ("ASSIGNOR")
