1. WHEREAS, the undersigned inventor/joint inventors, of residence(s) as listed (hereafter referred to as "Inventor(s)"), is/are the inventors of certain new and useful subject matter as below entitled (hereinafter referred to as "the Invention"), which has or may become the subject of a patent application or any other type of intellectual property protection application (hereafter referred to as "First Application");
2. WHEREAS, the Invention, being made in the circumstances set out in the German Employee Inventions Act, belongs to my/our, the Inventor(s) employer at that time, namely SRAM Deutschland GmbH, a company incorporated in Germany, whose registered address is Romstrasse 1, DE-97424 Schweinfurt, Germany (hereafter referred to as "Employer"); and
3. NOW, THEREFORE, to all whom it may concern be it known that I/we, the Inventor(s), confirm the ownership of the Invention by my/our Employer by operation of law under the German Employee Inventions Act and if, under the law of the United States, or any other country in the world, I/we, the Inventor(s) have any ownership right, title, and interest in the Invention or the First Application, including the right of priority of the First Application (which I/we do not believe to be the case and claim no ownership right, title, or interest in the Invention and in the First Application), for and in consideration of One Dollar (\$1.00) to (each) Inventor and to Employer and other good and valuable consideration, the receipt of which is hereby acknowledged, and without prejudice to statutory applicable national employee compensation act regulations and/or to employment contract provisions (cf. § 7 below), I/we, the Inventor(s), nevertheless assign and transfer to Employer all such ownership right, title, and interest, and Employer in turn hereby assigns and transfers to Assignee all of his ownership right, title and interest throughout the world in and to: (a) the Invention, the First Application, the right of priority of the First Application and all patents, applications and all other intellectual property rights, including utility models, industrial models and designs, which may be granted therefor in the United States and all foreign countries and/or which claim priority of said application, and all divisions, reissues, reexaminations, continuations, continuations-in-part, and/or extensions thereof; (b) any and all royalties, fees, income, payments, and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and (c) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on, or after the date hereof, including all rights to and claims for information, damages, restitution, and injunctive and other legal and equitable relief for past, present, and future infringement, misappropriation, violation, misuse, breach, or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages; the foregoing be held and enjoyed by said Assignee, its successors and assigns, as fully and entirely as the same would have been held and enjoyed by us, the Inventor(s) and/or the Employer, if this Assignment had not been made.

4. AND WE, the Inventor(s) and the Employer DO HEREBY authorize and request the United States Commissioner of Patents and Trademarks and corresponding bodies in other jurisdictions to issue all patents and all other intellectual property rights for said invention, or patents resulting therefrom, especially by claiming priority, insofar as our interest is concerned, to Assignee, its successors and/or assigns, as assignees of the entire right, title, and interest in and to the invention, for the sole use and benefit of the Assignee, and for its successors and assigns, to the full ends of the terms for which Letters Patent or the like may be granted.
5. AND the parties agree that this Assignment shall include also the right to file applications and obtain patents, utility models, industrial models and designs for said invention in Assignee's own name throughout the world, including all rights to publish cautionary appropriate registries and to claim the full benefit of any international agreement between the United States and any foreign country or countries.
6. This Assignment and all declarations herein shall be effective and binding without prejudice to any provisions on employee inventor compensation and any inalienable rights granted to the Inventor(s) under statutory employee invention regulations applicable to the Inventor(s) and/or under the Inventor's employment contract, those provisions and rights being subject to separate stipulation. Inextricably personal and non-transferable rights of the Inventor(s) are not part of this Assignment.
7. I/We, the Inventor(s), will communicate to Assignee any facts known to us respecting any improvements; and, at the expense of Assignee, I/we, the Inventor(s), will testify in any legal proceedings and sign all lawful papers, including all powers of attorney, applications, assignments, declarations, affidavits, exhibits, and any other papers in connection therewith, and otherwise cooperate with Assignee and do everything possible, as requested by Assignee, to perfect and fully vest all right, title, and interest to the foregoing in Assignee in all countries, and to aid Assignee to obtain and enforce proper protection for said invention in all countries.
8. This assignment shall be binding on the parties' successors, assigns and legal representatives. This assignment may be signed in counterparts, each of which shall be deemed an original and each of which taken together shall constitute one assignment. This assignment may be recorded and/or published.

Assignee and/or its designated counsel are hereby requested and authorized to complete the following filing date and application number when known:
