PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this “Patent Assignment”) from Transposit Corporation, a Delaware corporation (“Assignor”) to Harness Inc., a Delaware corporation (“Assignee”), is effective as of August 30, 2024.

WHEREAS, Assignor and Assignee have entered into a License, Waiver and Release Agreement, dated as of August 30, 2024 (the “Purchase Agreement”), pursuant to which, among other things, Assignor has agreed to assign to Assignee the Assigned Patents (as defined below).

1. Assigned Patents. The term “Assigned Patents” means the issued patents and pending patent applications set forth on Schedule A attached hereto.

2. Assignment. For good and valuable consideration, the receipt and adequacy of which is hereby acknowledged, Assignor hereby irrevocably assigns, transfers, sells and delivers to Assignee all of Assignor’s right, title, and interest in and to (i) the Assigned Patents and the inventions and improvements disclosed therein; (ii) all reissues, divisionals, continuations, continuations-in-part, extensions, renewals, reexaminations and foreign counterparts thereof; (iii) all patents and applications which claim priority to or have common priority with any such patents or patent applications, or are linked with any such patents or patent applications by terminal disclaimer; (iv) all income, royalties, damages and payments in respect of the Assigned Patents; and (v) all rights corresponding to any of the foregoing throughout the world, including the right to claim priority from any of the Assigned Patents, the right to register, prosecute and maintain any of the Assigned Patents, and the right to enforce, sue, claim remedies and recover damages for past, present and future infringement or other violation or impairment of any of the Assigned Patents, the same to be held and enjoyed by Assignee for its own use and enjoyment, and for the use and enjoyment of its successors, assigns and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor, if this assignment and sale had not been made.

3. Representations and Warranties. Assignor represents and warrants that, as of the date hereof: (i) Assignor owns the Assigned Patents; (ii) Assignor has the power and authority to execute this Patent Assignment; (iii) Assignor has not entered into any agreement that conflicts with the terms of this Patent Assignment.

4. Further Assurances. Assignor agrees that Assignee shall have the right to file or record this Patent Assignment with the United States Patent and Trademark Office or other such entities throughout the world, and Assignor authorizes and requests the relevant authorities to record Assignee as the assignee and owner of the Assigned Patents. Assignor shall execute and deliver to Assignee such documents and take such actions as requested by Assignee to register, evidence or perfect Assignee's rights under this Patent Assignment. In addition, Assignor hereby irrevocably designates and appoints Assignee and its duly authorized officers and agents as its agents and attorneys in fact, to act for and on their behalf and stead to execute and file any such documents and to do all other lawfully permitted acts to register, evidence or perfect Assignee’s rights under this Patent Assignment with the same legal force and effect as if executed by Assignor. This includes, but is not limited to, the power to insert on this Patent Assignment any further

identification that may be necessary to comply with the rules of the United States Patent and Trademark Office, or rules of other entities throughout the world, for recordation of this document.

5. Governing Law. This Patent Assignment shall be governed by, and construed in accordance with, the laws of the State of Delaware, regardless of the laws that might otherwise govern under applicable principles of choice or conflicts of law thereof.
