## ASSIGNMENT

WHEREAS, we, William Kaewert, Sam Coleman, and Kyle Miller, have jointly invented certain new and useful inventions described in the applications for United States Letters Patent listed in Exhibit A (“Applications”);

WHEREAS, Stored Energy Systems LLC, a Colorado limited liability company, having an address of 1840 Industrial Circle, Longmont, CO 80501 (“ASSIGNEE”), desires to acquire all right, title, and interest in and to the Applications, inventions and designs described in the Applications, and any Letters Patent issuing from the Applications in the United States and in all foreign countries;

NOW THEREFORE, be it known we, the inventors, for and in consideration of certain good and valuable consideration, the sufficiency and receipt of which is acknowledged, at the request of the ASSIGNEE sell, assign, and transfer unto ASSIGNEE, their successors, legal representatives, and assigns, the Applications and inventions and designs described therein for the territory of the United States of America and all continuation, divisional, continuation-in-part, and reissue applications associated therewith; all corresponding patent applications in foreign countries; all applications under the Patent Cooperation Treaty; all applications for extension filed or to be filed for the inventions; and all Letters Patent, Invention or Design Registrations, Utility Models, Extensions, Reissues, and other patent or registration rights obtained for the inventions or designs described in the Applications in the United States of America or any other country;

We also assign any right, title, and interest in and to the Applications and the inventions and designs described therein that have not already been transferred to the ASSIGNEE, which includes the right to be granted a patent in PCT contracting states, and the right to claim priority to the provisional application listed in Exhibit A;

We warrant that we have made no assignment of the Applications, inventions, designs, patents, registrations, or other protections therefor to a party other than ASSIGNEE and we are under no obligation to make any assignment to any other party; and

We further agree to cooperate with the ASSIGNEE in the obtaining and sustaining of any and all such Letters Patent and other protections contemplated herein and in confirming ASSIGNEE’s exclusive ownership of the Applications and inventions and designs described and claimed therein, but at the expense of ASSIGNEE.

We have reviewed and understand the contents of the Applications, including, if applicable, the claims thereof, which may have been amended by a preliminary amendment. We affirm the Applications were made or authorized to be made by us. We also acknowledge that each named inventor contributed to the conception of at least one of the inventions or designs disclosed or claimed in the Applications. We acknowledge the duty to disclose information material to patentability as defined in 37 CFR 1.56, including for continuation-in-part applications, material information that became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application. We hereby acknowledge that any willful false statement regarding inventorship of the Applications may be punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.
