EXHIBIT B**PATENT ASSIGNMENT**

In accordance with that certain Asset Purchase Agreement, dated June 1, 2024, between SelenBio, Inc., a Texas corporation ("Seller"), and Selenium Innovations, LLC, a Delaware Limited Liability Company ("Buyer"), for good and valuable consideration the receipt of which is hereby acknowledged, Seller does hereby sell, assign, convey, transfer and deliver to Buyer, its successors and assigns, all of the Seller's right, title, and interest in and to:

- (a) the patents, patent applications and invention disclosures specifically listed in Schedule A to this Patent Assignment; and
- (b) the following properties and rights with respect to all patents and patent applications (collectively "Patents") so listed in Schedule A:
 - (i) the inventions claimed or described in the patents or applications,
 - (ii) any patents and patent applications in the United States and anywhere else in the world that have been or may be granted or filed, respectively, with respect to those inventions, including without limitation all foreign patents that may claim priority based on and correspond to the patents and patent applications listed in Schedule A,
 - (iii) all divisions, renewals, reissues, continuations, extensions, and (if filed by or for Buyer) continuations-in-part of the foregoing patents and patent applications,
 - (iv) all income, royalties, damages, and payments due or payable to the Assignor with respect to the patents, including without limitation unpaid damages and payments for past, present, and future infringements of any patent, and
 - (v) all rights to sue and recover damages and payments for past, present, and future infringements of any of the patents, including the right to fully and entirely replace the Seller in all related matters.

The foregoing rights in and under the patents shall apply to the full end of their terms as fully as the Seller would have held the same in the absence of this Assignment. As of the date set forth below, the Assignee has succeeded to all right, title, and standing of the Seller to (a) receive all rights and benefits pertaining to the patents and patent applications described, and (b) commence, prosecute, defend and settle all claims and take all actions that the Buyer, in its sole discretion, may elect in relation to the patents and rights described above.

Seller hereby authorizes and requests the officials of the United States Patent and Trademark Office and the corresponding officials of any and all other countries worldwide to issue any and all patent applications, when granted, to Buyer, as buyer of Seller's entire right, title and interest in and to the same, for the sole use and benefit of the Buyer, its successors and assigns.

Seller also agrees that it or he, respectively, will reasonably cooperate with Buyer to fully carry out the terms of this Assignment and that it will promptly sign and/or deliver to Buyer all assignments, affidavits and other documents which may be reasonably necessary to record this Assignment and any prior assignments or other transfers of ownership of the patents or patent applications in any country of the world and otherwise perfect Buyer's ownership of the patent, patent applications and inventions.

Seller also agrees to assist Buyer in the prosecution of the patent applications identified herein, including any application for reissue, application for reexamination, application for foreign patent rights, or any proceeding in the United States Patent and Trademark Office affecting the inventions.

IN WITNESS WHEREOF, Seller has caused this Patent Assignment to be executed this one day of June, 2024, to be effective June 1, 2024.
