WHEREAS, CityPost, LLC, a company organized and existing under the laws of Washington, having a place of business at 17 N. Legend Tree Drive, Liberty Lake, Washington 99019 ("Assignor"), having claimed certain inventions (including discoveries) as set forth in the attached Schedule A (the "Patents");

WHEREAS, PrimeSource Building Products, Inc., a company organized and existing under the laws of Texas, having a place of business at 1321 Greenway Drive, Irving, Texas 75038-2504 (collectively, with successors and assigns, "Assignee"), is desirous of acquiring the entire right, title, and interest, as hereinafter recited;

NOW THEREFORE, for valuable consideration furnished by Assignee, the receipt and sufficiency of which is hereby acknowledged, Assignor does without reservation:

1. Assign, transfer, and convey to Assignee the entire right, title, and interest in and to said inventions, any patent applications on said inventions in any countries, including divisionals, continuations, and reissues, as well as applications filed on other embodiments of the same subject matter based in whole or in part upon said inventions, and every priority right that is or may be predicated upon or arise from said inventions, including all rights to sue and collect damages for past, present or future infringement, misappropriation, unfair competition, or other violation of the foregoing, and all rights to recover damages, lost profits, restitution, and injunctive or other legal and equitable relief in connection therewith, and all rights corresponding thereto;

2. Authorize Assignee to file patent applications throughout the world on any of said inventions in the name of the Assignee or otherwise, as Assignee may deem advisable, while understanding that nothing in this Assignment obligates the Assignee to file any patent application or take any action with respect to any patent application;

3. Authorize and request the Commissioner of Patents of the United States and the empowered officials of all other governments to issue or transfer all said patent applications and patents arising therefrom, as assignee of the entire right, title, and interest therein, or otherwise as Assignee may direct;

4. Warrant that the Assignor has not knowingly conveyed to others any right, title, or interest in said inventions, applications, patent applications, or patents, in any way that derogates or limits Assignee's rights under this Assignment;

5. Bind Assignor, upon Assignee's request and at Assignee's expense, but without additional consideration, to do all reasonable acts to assure that said inventions, patent applications, and patents shall be held and enjoyed by Assignee as fully and entirely as the same could have been held and enjoyed by Assignor if this assignment had not been made; to execute and deliver to Assignee all lawful application documents as requested by Assignee; to communicate to Assignee all facts known relating to said inventions or the history thereof; and to furnish Assignee with any and all documents, photographs, models, samples, and other physical exhibits that may be useful for establishing conception and reduction to practice of said inventions.
