INTELLECTUAL PROPERTY SECURITY AGREEMENT

This INTELLECTUAL PROPERTY SECURITY AGREEMENT (as amended, amended and restated, supplemented or otherwise modified from time to time, the "*IP Security Agreement*") dated December 13, 2007, is made by the Person listed on the signature page hereof (the "*Obligor*") in favor of ROYAL BANK OF CANADA, as Administrative Agent (the "*Administrative Agent*") for the Secured Creditors (as defined in the Security Agreement referred to below).

WHEREAS, 2149692 Ontario Inc. ("*2149692*"), Husky Injection Molding Systems Ltd. ("*Husky*") and Husky Injection Molding Systems S.A. ("*Husky Luxembourg*", together with the 2149692 and Husky, the "*Borrowers*") and certain other Subsidiaries of Holdco have entered into a Credit Agreement dated as of December 13, 2007 (as amended, amended and restated, supplemented or otherwise modified from time to time, the "*Credit Agreement*"), with the Lenders party thereto and Royal Bank of Canada, as administrative agent (together with any successor administrative agent appointed pursuant to Section 17.01 of the Credit Agreement). Terms defined in the Credit Agreement and not otherwise defined herein are used herein as defined in the Credit Agreement.

WHEREAS, as a condition precedent to the extension of credit to the Borrowers under the Credit Agreement the Obligor has executed and delivered that certain Security Agreement dated December 13, 2007 made by the Obligor in favour of the Administrative Agent (as amended, amended and restated, supplemented or otherwise modified from time to time, the "*Security Agreement*") as security for the payment and performance of the Obligor's obligations under the Credit Agreement and the other Credit Documents to which it is a party.

WHEREAS, under the terms of the Security Agreement, the Obligor has granted to the Administrative Agent, for the ratable benefit of the Secured Creditors, a security interest in, among other property, certain intellectual property of the Obligor, and has agreed as a condition thereof to execute this IP Security Agreement for recording with the U.S. Patent and Trademark Office, the United States Copyright Office and other Governmental Authorities.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Obligor agrees as follows:

SECTION 1. Grant of Security. The Obligor hereby grants to the Administrative Agent for the ratable benefit of the Secured Creditors a security interest in all of the Obligor's right, title and interest in and to the following (the "*Collateral*"):

(a) the patents and patent applications set forth in Schedule A hereto (the "*Patents*");

(b) the trademark and service mark registrations and applications set forth in Schedule B hereto (*provided* that no security interest shall be granted in any United States intent-to-use trademark applications until an amendment to allege use or statement of use has been filed and accepted by the United States Patent and Trademark Office), together with the goodwill symbolized thereby (the "*Trademarks*");

(c) all material copyrights, whether registered or unregistered, now owned or hereafter acquired by the Obligor, including, without limitation, copyright registrations and applications and exclusive copyright licenses set forth in Schedule C hereto (the "*Copyrights*");

(d) all reissues, divisions, continuations, continuations-in-part, extensions, renewals and reexaminations of any of the foregoing, all rights in the foregoing provided by international treaties or conventions, all rights corresponding thereto throughout the world and all other rights of any kind whatsoever of the Obligor accruing thereunder or pertaining thereto;

(e) any and all claims for damages and injunctive relief for past, present and future infringement, dilution, misappropriation, violation, misuse or breach with respect to any of the foregoing, with the right, but not the obligation, to sue for and collect, or otherwise recover proceeds arising from such damages; and

(f) any and all proceeds of, collateral for, income, royalties and other payments now or hereafter due and payable with respect to, and supporting obligations relating to, any and all of the Collateral of or arising from any of the foregoing.

(g) Notwithstanding the foregoing, "*Collateral*" shall not include any Restricted Asset, in each case, until it is no longer a Restricted Asset. A "*Restricted Asset*" is any property or asset of the Obligor with respect to which the granting or making of a security interest would result in the abandonment, invalidation or unenforceability of, or any material breach, termination or material default under, any such property or asset or any agreement relating to the Obligor's interest in such property or asset. However, any such property or asset will not be a Restricted Asset if and to the extent that the applicable PPSA or other applicable law (i) renders the defaulted or breached provision, including any requirement of consent to the granting or making of a security interest, unenforceable against third parties or otherwise ineffective to prevent the granting or making of a security interest, or (ii) provides that the granting or making of a security interest does not give rise to a breach or default notwithstanding the terms governing the property or

asset, including any related agreement. Notwithstanding the above, the Obligor will hold as trustee the Restricted Asset and all proceeds arising under or in connection with the Restricted Asset in trust for the Administrative Agent, for the benefit of the Secured Creditors, on the following basis:

- (i) subject to the Credit Agreement, until the security interest is enforceable, the Obligor is entitled to receive and use the Restricted Asset and all such proceeds and to deal with the Restricted Asset and all such proceeds to the extent not prohibited by the Credit Agreement; and
- (ii) whenever the security interest is enforceable, (i) immediately upon request by the Administrative Agent, all rights of the Obligor to receive, use or deal with such proceeds cease and all such proceeds will be immediately paid over to the Administrative Agent for the benefit of the Secured Creditors, and (ii) the Obligor will take all actions reasonably requested by the Administrative Agent to collect and enforce payment and other rights arising under the Restricted Asset and with respect to such proceeds.

SECTION 2. Security for Obligations. The grant of a security interest in, the Collateral by the Obligor under this IP Security Agreement secures the payment of all obligations of the Obligor now or hereafter existing under or in respect of the Credit Documents, whether direct or indirect, absolute or contingent, and whether for principal, reimbursement obligations, interest, premiums, penalties, fees, indemnifications, contract causes of action, costs, expenses or otherwise (the "*Secured Obligations*"). Without limiting the generality of the foregoing, this IP Security Agreement secures, as to the Obligor, the payment of all amounts that constitute part of the Secured Obligations and that would be owed by the Obligor to any Secured Creditor under the Credit Documents but for the fact that such Secured Obligations are unenforceable or not allowable due to the existence of a bankruptcy, reorganization or similar proceeding involving a Loan Party.

SECTION 3. Recordation. The Obligor authorizes and requests that the Register of Copyrights, the U.S. Patent and Trademark Office, the Commissioner for Patents and the Commissioner for Trademarks and any other applicable government officer in Canada and/or the United States record this IP Security Agreement.

SECTION 4. Execution in Counterparts. This IP Security Agreement may be executed in any number of counterparts, each of which

when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement.

SECTION 5. Grants, Rights and Remedies. This IP Security Agreement has been entered into in conjunction with the provisions of the Security Agreement. The Obligor does hereby acknowledge and confirm that the grant of the security interest hereunder to, and the rights and remedies of, the Administrative Agent with respect to the Collateral are more fully set forth in the Security Agreement, the terms and provisions of which are incorporated herein by reference as if fully set forth herein.

SECTION 6. Governing Law. This IP Security Agreement shall be governed by, and construed in accordance with, the laws of the Province of Ontario and the federal laws of Canada applicable therein.

SECTION 7. English Language. At the request of the parties hereto, this Agreement and all documents related thereto have been drafted in English. A la demande des parties aux présentes, ce Contrat ainsi que tous les documents s'y rapportant ont été rédigés en anglais.

IN WITNESS WHEREOF, the Obligor has caused this IP Security Agreement to be duly executed and delivered by its officer thereunto duly authorized as of the date first above written.
