## INTELLECTUAL PROPERTY ASSIGNMENT

This INTELLECTUAL PROPERTY ASSIGNMENT (this "Assignment"), effective the 1st day of July, 2014 (the "Effective Date"), is made and entered into by and between Ferro Corporation, an Ohio corporation ("Assignor") and A. Schulman, Inc., a Delaware corporation ("Assignee") (each a "Party," and collectively, the "Parties"). Capitalized terms used herein but not otherwise defined herein will have the meanings set forth in the Purchase Agreement (defined below).

### RECITALS

1. Assignor, Ferro Spain, S.A., Assignee and A. Schulman Castellon, S.L.U. have entered into that certain Asset Purchase Agreement, dated as of June 3, 2014 (as amended from time to time, the "Purchase Agreement"), pursuant to which, among other things, Assignor has agreed to sell, assign, transfer and deliver to Assignee certain Sold Assets on the terms and subject to the conditions set forth in the Purchase Agreement.

2. The Sold Assets include, without limitation, the patents and patent applications set forth on Schedule A hereto (collectively, the "Transferred Patents") and the trademarks and trademark applications set forth on Schedule B hereto (collectively, the "Transferred Trademarks" and together with the Transferred Patents, the "Transferred IP").

3. Assignor and Assignee now desire to enter into this Assignment to evidence the sale, assignment, transfer and delivery to Assignee of the Transferred IP.

For good and valuable consideration, including the consideration set forth in the Purchase Agreement, the receipt and sufficiency of which is hereby acknowledged, Assignor and Assignee hereby agree as follows:

1) Patent Assignment. Assignor hereby sells, assigns, transfers and delivers to Assignee, and Assignee hereby purchases and acquires from Assignor, all rights, title, and interests of Assignor:

(a) in and to the inventions as described in the Transferred Patents, for the United States and its possessions and territories and for all foreign countries (including, without limitation, all rights therein provided by international conventions and treaties),

(b) in and to the Transferred Patents along with all rights of priority created by patent applications included with the Transferred Patents under the Paris Convention and any other related treaty,

(c) in and to all United States and foreign patents and utility models which may be granted on any and all of the Transferred Patents including reissues, reexaminations, extensions or foreign equivalents, and all other corresponding rights

that are or may be secured under the laws of the United States or any foreign country, now or hereafter in effect,

(d) in and to all causes of action and rights to sue for and damages resulting from past, present and future infringement or other unauthorized use of all United States and foreign patents granted or to be granted on the Transferred Patents and the inventions disclosed therein, including extensions, reissues, and reexamination certificates thereto, and

(e) in and to all income, royalties, damages or payments accrued, due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Transferred Patents, with the right to sue for, and collect the same,

in each case, for Assignee's own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made.

2) Trademark Assignment. Assignor hereby sells, assigns, transfers and delivers to Assignee, and Assignee hereby purchases and acquires from Assignor, all rights, title, and interests of Assignor

(a) in and to the Transferred Trademarks, for the United States and its possessions and territories and for all foreign countries (including, without limitation, all rights therein provided by international conventions and treaties), together with the goodwill of the business in connection with which the Transferred Trademarks are used,

(b) in and to all United States and foreign registrations, renewals, and extensions of the Transferred Trademarks, now or hereafter in effect,

(c) in and to all causes of action and rights to sue for and damages resulting from past, present and future infringement or other unauthorized use of all United States and foreign trademarks granted or to be granted on the Transferred Trademarks, and

(d) in and to all income, royalties, damages or payments accrued, due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Transferred Trademarks, with the right to sue for, and collect the same,

in each case, for Assignee's own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made.

3) No Warranties. Except as expressly provided in the Purchase Agreement, Assignor makes no warranties, express or implied, with respect to the Transferred IP.

4) Recording. Assignor hereby authorizes and requests (1) the Commissioner of Patents of the United States, and any other official of any applicable Governmental Authority, to record this Assignment and to issue any and all registrations from any and all applications for registration included in the Transferred Patents to and in the name of Assignee and (2) the Commissioner of Trademarks of the United States, and any other official of any applicable Governmental Authority, to record this Assignment and to issue any and all registrations from any and all applications for registration included in the Transferred Trademarks to and in the name of Assignee.

5) Further Assurances. Assignor will, upon request of Assignee, and without further remuneration, timely execute, or cause its affiliates or current or former employees of Assignor or any Affiliate of Assignor to execute and deliver any additional documents and perform such additional acts reasonably necessary to record and perfect the interest of Assignee in and to the Transferred IP. Upon request of Assignee, and without further remuneration, Assignor will execute, or will cause its Affiliates or current or former employees of Assignor or any Affiliate of Assignor to execute, any and all papers reasonably requested by Assignee for the filing, prosecution, and granting of patent applications related to the inventions disclosed in the Transferred Patents and the perfecting of title thereto in Assignee. Assignor will make a commercially reasonable effort to secure the signature of employees referenced in this section who are not employed by Assignor at the time of a request by Assignee.

6) Interpretation. This Assignment is intended to implement the provisions of the Purchase Agreement, is expressly subject to the terms and conditions thereof, and will not be construed to enhance, extend or limit the representations and warranties, rights, obligations or remedies of any party to the Purchase Agreement. In case of any conflict between the terms and conditions of this Assignment and the terms and conditions of the Purchase Agreement, the terms and conditions of the Purchase Agreement will govern.

7) Headings. The headings contained in this Assignment are included for convenience only, and will not affect in any way the meaning or interpretation of this Assignment.

8) Governing Law. The validity, interpretation and enforcement of this Assignment will be governed by the Laws of the State of Ohio, other than any choice of Law provisions thereof that would cause the Laws of another state to apply.

9) Counterparts; Electronic Signatures. This Agreement may be executed in one or more counterparts, each of which will be deemed an original, but all of which together will constitute one and the same instrument. The electronic transmission of any signed original counterpart of this Agreement will be deemed to be the delivery of an original counterpart of this Agreement.

IN WITNESS WHEREOF, the Assignor and Assignee have caused this Assignment to be executed by its duly authorized representatives.
