INTELLECTUAL PROPERTY SECURITY AGREEMENT

This Intellectual Property Security Agreement (this "Agreement") is entered into as of May 31, 2016 (the "Effective Date") by and among ORIX VENTURES, LLC, a Delaware limited liability company ("Lender"), and TAPJOY, INC., a Delaware corporation ("Grantor").

RECITALS

A. Lender has agreed to make certain advances of money and to extend certain financial accommodations to Grantor in the amounts and manner set forth in that certain Loan and Security Agreement by and between Lender and Grantor dated as of the date hereof (as the same may be amended, modified or supplemented from time to time, the "Loan Agreement"; capitalized terms used herein are used as defined in the Loan Agreement). Lender is willing to make the Loans to Grantor, but only upon the condition, among others, that Grantor shall grant to Lender a security interest in all of its Intellectual Property to secure the obligations of Grantor under the Loan Agreement.

B. Pursuant to the terms of the Loan Agreement, Grantor has granted to Lender a security interest in all of Grantor's right, title and interest, whether presently existing or hereafter acquired, in, to and under all of the Collateral. The Collateral includes without limitation all Intellectual Property (including without limitation the Intellectual Property described herein).

NOW, THEREFORE, for good and valuable consideration, receipt of which is hereby acknowledged, and intending to be legally bound, as collateral security for the prompt and complete payment when due of its obligations under the Loan Agreement, Grantor hereby represents, warrants, covenants and agrees as follows:

AGREEMENT

1. To further evidence the security interest granted under the Loan Agreement, Grantor grants and pledges to Lender a first-priority security interest in all of Grantor's right, title and interest in, to and under its Intellectual Property (including without limitation those copyrights, patents, trademarks and mask works listed on Schedules A, B and C hereto), and including without limitation all proceeds thereof (such as, by way of example but not by way of limitation, license royalties and proceeds of infringement suits), the right to sue for past, present and future infringements, all rights corresponding thereto throughout the world and all re-issues, divisions continuations, renewals, extensions and continuations-in-part thereof.

2. Grantor represents and warrants that as of the Effective Date (i) listed on Schedule A are all copyrights, software, computer programs, mask works, and other works of authorship owned or controlled by such Grantor which are registered with the United States Copyright Office, (ii) listed on Schedule B hereto are all patents and patent applications owned or controlled by such Grantor, and (iii) listed on Schedule C are all trademark registrations and pending registrations owned or controlled by such Grantor.

3. No Grantor shall, hereafter, register any maskworks, software, computer programs or other works of authorship subject to United States copyright protection with the United States Copyright Office without first complying with the following: (i) providing Lender with at least five (5) days prior written notice thereof, (ii) providing Lender with a copy of the application for any such registration and (iii) executing and filing such other instruments, and taking such further actions as Lender may reasonably request from time to time to perfect or continue the perfection of Lender's interest in the Collateral, including without limitation the filing with the United States Copyright Office, simultaneously with the filing by such Grantor of the application for any such registration, of a copy of this Agreement or a Supplement hereto in form acceptable to Lender identifying the maskworks, software, computer programs or other works of authorship being registered and confirming the grant of a security interest therein in favor of Lender.

4. This security interest is granted in conjunction with the security interest granted to Lender under the Loan Agreement. The rights and remedies of Lender with respect to the security interest granted hereby are in addition to those set forth in the Loan Agreement and the other Loan Documents, and those which are now or

hereafter available to Lender as a matter of law or equity. Each right, power and remedy of Lender provided for herein or in the Loan Agreement or any of the Loan Documents, or now or hereafter existing at law or in equity shall be cumulative and concurrent and shall be in addition to every right, power or remedy provided for herein and the exercise by Lender of any one or more of the rights, powers or remedies provided for in this Intellectual Property Security Agreement, the Loan Agreement or any of the other Loan Documents, or now or hereafter existing at law or in equity, shall not preclude the simultaneous or later exercise by any person, including Lender, of any or all other rights, powers or remedies.

5. This Agreement may not be modified or amended, nor may any rights hereunder be waived, except in a writing signed by the parties hereto. This Agreement and all acts, transactions, disputes and controversies arising hereunder or relating hereto, and all rights and obligations of Lender and Grantor shall be governed by, and construed in accordance with the internal laws of the State of California without regard to conflict of laws principles, provided that Lender shall retain all rights arising under Federal law.

Tapjoy Patent Matters

Tapjoy, Inc.	US	13/753,743	1/9/13	Competing Mobile App Conversions	Paul Longhenny, Christopher Farm, Van Pham	Pending	Method for identifying which account a mobile device is associated with in an environment where access to a device's unique device identifier (UDID) is limited. Apps contain protocol handlers that respond to messages tagged with certain protocol identifiers/ prefixes, such as a link that is formatted according to a particular protocol. As a result of receiving a request with a certain protocol identifier prefix, a software development kit (SDK) running as native app code obtains a device identifier (UDID) from the device and provides the device identifier to a server or another app.

Tapjoy, Inc.	US	13/802,027	3/13/13	Extrinsic Incentivized Scaffolding In Computer Games Via Advertising Responsive To Intrinsic Game Events	Hans-Frederick Brown, Shane Mihelic-Booth	Pending	A publisher of an app identifies scaffolding events in the app, which are events at which a user may be provided with a reward in exchange for viewing an ad. For example, adverse events in games, such as an in-game character losing energy, may trigger a scaffolding event. The publisher may identify, for each app event, an associated reward type and an incentive frequency value, indicating how frequently the app event should trigger a scaffolding event. App logic determines whether to generate a scaffolding event in response to an occurrence of an app event based on an incentive frequency value associated with the app event.

Tapjoy, Inc.	US	13/628,771	3/14/13	Intelligent Adjustment Of Graphical User Interfaces	Hai Van Pham	Expired	Graphical interface adjusts "intelligently" based on detected patterns in user interactions. Adjustments to graphical interfaces include automatic content advancement, modifying display locations of content, and removal, resizing, or relocation of interface components. For example, based on a determination that the user frequently paginates twenty seconds after the loading of a page, an app may automatically cause pagination to occur twenty seconds after loading of the page.
Tapjoy, Inc.	US	13/920,294	6/18/13	Mobile Device Advertising Chains	Paul Longhenny, John Gronberg, Jiangyi Pan, James Logsdon	Allowed	A primary offer and a secondary offer including a call to action are presented at a device. If the device completes an action associated with the secondary offer, the system sums the values associated with the primary and secondary offer and subsequently uses the summed value to select offers to display at other devices. For example, based on a determination that the summed value of both the primary and secondary offer is high, the system may subsequently choose to display the primary offer at a second device over a different offer even if the value associated with the different offer is higher than the value associated with the primary offer alone.

US	14/205,807	3/12/14	Rewarding Mobile App Installations Without A Software Development Kit In The Mobile App	Christopher Paul Farn, Brian Stebar, Johnny Chan, Steve Tan	Allowed	Method for detecting the installation or opening of a publisher app without requiring the publisher to include a software development kit (SDK) in the publisher app. A second publisher app, which contains the SDK, is installed on the same device as a first publisher app that doesn't include an SDK. The second publisher app alerts the reward server when the first publisher app is selected. Subsequently, when the second publisher app is opened, the second publisher app checks for any protocol handlers and sends a notification to the reward server identifying any apps for which protocol handlers are present. The notification identifies the first publisher app if a protocol handler associated with the first app is present on the device. When the reward server receives such a notification, the reward server determines that the first publisher app has been installed on the device.

Tapjoy, Inc.	US	14054,891	10/15/13	Display	Hans-Frederick Brown, Shane Mineic-Booth, Ravi Dev	Allowed	An ad delivery server receives a specification for a compound ad containing multiple ad units. The specification indicates that ad units are to be shown in a particular order and different bid values are associated with each ad unit. The ad delivery server selects a particular ad unit for display among a plurality of different ad units of different compound ads based on bid value associated with the particular ad unit. The selection of the particular ad unit may also be based on a bonus bid value associated with the particular ad unit. The particular ad unit may further be selected based on a determination that a particular type of monetization event associated with the particular ad unit, such as the user running out virtual currency, has occurred.
